

Press Release

Clement Driscoll of C.J. Driscoll & Associates to present a 360° view of the Latin American telematics market

Telematics Update: Clem Driscoll, founder, C.J. Driscoll & Associates, will give a keynote presentation at the Telematics Brazil & LATAM Conference & Exhibition (24-25 September, Hotel Tivoli, São Paulo). He will present an overview of the telematics market across the continent and discuss the most prominent countries, the relevant services available, as well as significant growth stats and strategies.

What are the money-making services, how are international players adapting their global solutions to local problems and what is the balance between commercial and consumer solutions – these are questions that Clem will answer.

Telematics Brazil & LATAM 2014 will look into ways to capitalize on low cost solutions and create solid business models that will increase profitability and drive the telematics market in the region. It will focus on new technologies and trends, legislation and business models that are set to change the landscape of telematics and help you establish the winning relationships that will put your business on the road to success.

Create value for telematics solutions and drive profitable business towards a connected ecosystem

Telematics Brazil & LATAM 2014 project director, Ina Vaduvescu, stated: ‘It will be critical that companies evaluate the success and shortcomings of the first telematics wave and embrace key breakthroughs in the wider connected ecosystem to create an indispensable telematics service package to combat existing theft and road safety issues.’

The Topics and Trends changing Telematics in Brazil & LATAM:

Take a look at the must know trends and topics to get up to speed on:

- **LATAM Ready for the Internet of Cars:** Watch out for OEMs’ reaction to the latest regulatory delays and the uptake of telematics solutions in the region to capitalize on the full aftermarket and embedded market potential and build money-making businesses
- **New Spin on Commercial Telematics:** Commoditization of telematics services is imminent in order to build a healthy, competitive ecosystem where predictive maintenance and sophisticated fleet management solutions are within reach!
- **Time for Green Driving and ADAS:** Make room for eco telematics, car sharing and carpooling and hear how the implementation of ADAS services will financially impact the commercial and passenger sectors

- **End Users Have Their Say:** Take a step back from the tech. paraphernalia to hear what end users really need and what they are willing to pay for to build specific, targeted telematics packages
- **Join the Connected Lifestyle:** No need to pick – traffic data, navigation, weather, safety and more is flowing through consumers’ smartphones – discuss how to analyze the Latin American data in line with users’ needs and curate the perfect in-car connected services
- **Insurance Telematics Rises to the Occasion:** Corporate fleets, long term rental, 24hr breakdown coverage – define the USP for each target audience through differing product offerings to create a cycle of innovation and find the formula to takes insurance telematics mainstream in Brazil

and many more sessions on topics such as in-car connectivity, infotainment, security, and exclusive case studies and announcements from Daimler FleetBoard, BMW and Volvo.
